Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 June 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Inventorship

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Oath/Declaration

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the foreign application for patent or inventor's certificate on which priority is claimed pursuant to 37 CFR 1.55, and any foreign application having a filing date before that of the application on which priority is claimed, by specifying the application number, country, day, month and year of its filing.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the

Art Unit: 3747

invention. The claims are replete with terms that lack antecedent basis, and unclear language too numerous to mention in every instance. The following are several examples:

Claim 1, line 7, "the duration of time" lacks of antecedent basis.

Claim 1, line 3; and claim 8, line 7, the recitation of "control amount of the internal combustion engine" renders the claim indefinite, since it is not clear that which amount of the internal combustion engine to be controlled such as amount of air, amount of fuel, amount of time or time interval. Applicants are required to define the amount to which reference to be controlled.

The claims not specifically mentioned are indefinite since they depended from one of the above claims.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshino et al (US 6,251,046).

Regarding claim 1, the reference of Yoshino et al discloses an automatic engine stop control apparatus for internal combustion engine including the following subject matters:

a first controller which, when a predetermined stopping condition has been fulfilled while the engine is idling and a learning execution condition for executing learning of a control amount of the internal combustion engine has been fulfilled, automatically stops the internal combustion engine based on both the completion of learning based on the learning execution condition and

Art Unit: 3747

the duration of time that has passed after the predetermined stopping condition has been fulfilled (col. 3, line 1 through col. 4, line 40; and col. 5, line 3 through col. 6, line 65); and

a second controller which automatically starts the internal combustion engine which has been automatically stopped when a predetermined starting condition has been fulfilled (col. 2, lines 52-67).

Regarding claims 2-7, as discussed in claim 1.

Regarding claims 8-14, as discussed in the control apparatus of claims 1-7.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Uchida (US 6,308,129 B1), and Nakajima et al (US 6,275,759 B1).
